

.223 Rem. Special Operations

5.56 mm x 45

- 100 % energy transfer in soft targets
- Excellent performance on soft targets behind car glass
- Hyper expanding bullet
- Low risk to bystanders

Application:

Anti-personal sniper cartridge for special operations at a range of up to 150 meters. The hyper expanding bullet provides extre-

me stopping power with low endangerment of the surrounding. It assures reliable function in most common police rifles.

Cartridge Data

case material:	CuZn - alloy
primer:	large rifle
propellant:	double base
projectile:	Special Operations (JHP)
ballistic coefficient C1:	0.183
projectile weight:	53 gr. / 3.4 g
jacket material:	copper - alloy
core material:	lead - alloy

Technical Data

temperature range:	-30°C to +52°C
velocity at 10 m:	1030 m/s (test barrel length 600 mm)
mean chamber pressure:	max. 4300 bar
accuracy 100 m:	s _a 27 mm

Packing and Marking:	In accordance with customers' requirements
	Errors and technical changes excepted
