

.338 Lapua Mag. SWISS P AP

8.6 mm x 70

- Compatible with all .338 Lapua Mag. bolt action weapons
- Universal combination of excellent accuracy with maximum penetration
- Same trajectory as Ball/Target

Application:

Maximum penetration to overcome armoured targets which are protected by vests, bulletproof glass, light armour and other cover. The SWISS P projectile with a tungsten carbide penetrator of a new de-

sign (patented bullet) will defeat targets, even at a long range. With matching trajectory, the SWISS P Armour Piercing cartridge will penetrate the hardened target with precision fire.

Cartridge Data

weight:	45 g
case material:	CuZn - alloy
primer:	large rifle magnum
propellant:	single base
projectile:	FMJHC
ballistic coefficient C1:	0.654 (ICAO)
projectile weight:	260 grs / 16.8 g
jacket material:	CuZn - alloy
core material:	WCCo + PbSb - alloy
dimensions:	in accordance with CIP
marking:	black tip

Technical Data

temperature range:	between -54°C and +52°C
muzzle velocity:	min. 830 m/s
mean chamber pressure:	max. 4200 bar
accuracy 100 m:	100% radius 18 mm, 10 rounds
accuracy 500 m:	100 % radius 90 mm, 10 rounds
penetration 550 m:	12 mm steel at an angle of 0

Packaging and Marking:	In accordance with customers' requirements
	Errors and technical changes excepted
